

# American Chlorinating Machine

## Model 1063

---

- Processes soles with heels up to 1  $\frac{3}{4}$  inches
- Applies solution & scrubs treated surface with brush
- Fumes contained & easily extracted
- Easy access allows cleaning of reservoirs
- Optional 1063/S with side conveyor for feed through Sole Processing Systems
- Optional 1063/WB with modification machine can be fitted to apply uniform coat of waterbased adhesive.

A simple feed-through chlorinating system for chlorinating flat or heeled soles is available with the American Chlorinating Machine.

Soles are loaded in one side and carried over a sponge roller that applies solution, a scrub brush removes contamination and another sponge roller then applies more solution before the sole exits the machine.

This feed-through conveyORIZED process allows this machine to be used in various American Outsole Processing Systems.
